WASTE POWDER

TRAPS BAD ODORS!

CLEANER VEHICLES,
MORE EFFICIENT OPERATIONS.

By absorbing leachate and excess moisture, it helps reduce liquid buildup and organic load in garbage trucks.

TRAPS BAD
ODORS

ABSORBS
LIQUIDS

REDUCES
ORGANIC LOAD

SUPPORTS VEHICLE
MAINTENANCE

WASTE POWDER

Reduce the impact of leachate at the source.

The acidic nature, organic load and moisture of garbage leachate can cause corrosion on steel surfaces and wear on equipment. Waste powder supports vehicle maintenance by reducing liquid buildup.

ABSORBS LIQUIDS

Thanks to its high absorbency, it soaks up leachate and excess moisture.

REDUCES ORGANIC LOAD

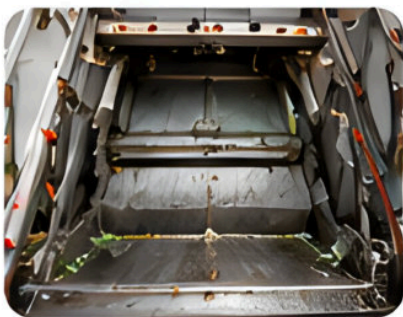

The probiotic bacteria it contains help break down organic matter.

MAINTENANCE SUPPORT

By reducing moisture and organic load, it helps protect steel surfaces.

Critical Areas It Protects

Compaction chamber

Surfaces where waste and liquid buildup is heaviest.

Leachate channels and tanks

Internal sections where liquid collects and flows.

Sensors and floats

Control components that can be affected by dirt and buildup.

Discharge door and seal areas

Points exposed to leaks, moisture and surface deposits.

Less Buildup

Longer Equipment Life

Lower Maintenance Costs

Workplace Hygiene
